

HAZMATU ONLINE LEARNING

HazmatU was created for those working in the automotive industry to gain a clear and accurate understanding of complex Hazmat shipping regulations. Who should be trained?

- Parts Managers
- Drivers
- Supervisors
- Technicians
- Shippers & Receivers

The HazmatU learning modules are offered on a per-rooftop basis for \$299 giving you a 12-month (unlimited users) subscription.

**ATI & CCAR have
partnered up to offer
you resources to help
keep your staff
productive and on the
shop floor.**

Shipping parts incorrectly can be costly. The maximum penalty for a violation of the Hazardous Materials Regulations (HMR) is \$50,000 per day per violation. Air bag modules, seat belt pretensioners, and batteries are all sample hazmats.

CCAR is a non-profit organization with a focus on the automotive industry and its needs for safety and hazardous material compliance training. Founded in 1994, CCAR is one of the original OSHA Alliance Partners and is the *only* OSHA Ambassador focused on providing safety best-practice information to the automotive collision and repair industries. CCAR has twice been recognized by the ASE Training Managers Council (ATMC) with their "National Excellence in Training" award.
